Bootstrap 5 Forms

[‹ Previous]   [Next ›]

Stacked Form

All textual <input> and <textarea> elements with class `.form-control` get proper form styling:

Email:

| Enter email |

Password:

| Enter password |

☐ Remember me

[Submit]

Example

```
<form action="/action_page.php">
  <div class="mb-3 mt-3">
    <label for="email" class="form-label">Email:</label>
    <input type="email" class="form-control" id="email" placeholder="Enter email" name="email">
  </div>
  <div class="mb-3">
    <label for="pwd" class="form-label">Password:</label>
    <input type="password" class="form-control" id="pwd" placeholder="Enter password" name="pswd">
```

☐ **Dark mode**

☰   🏠   **HTML**   **CSS**   ◑   🌐   🔍

```
    <label class="form-check-label">
      <input class="form-check-input" type="checkbox" name="remember">
Remember me
    </label>
  </div>
  <button type="submit" class="btn btn-primary">Submit</button>
</form>
```
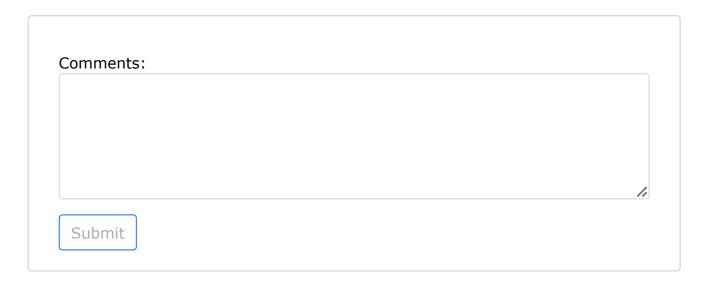

Try it Yourself »

Also note that we add a `.form-label` class to each label element to ensure correct padding.

Checkboxes have different markup. They are wrapped around a container element with `.form-check`, and labels have a class of `.form-check-label`, while checkboxes and radio buttons use `.form-check-input`.

Textarea

Comments:

[   ]

[Submit]

Example

```
<label for="comment">Comments:</label>
<textarea class="form-control" rows="5" id="comment" name="text">
</textarea>
```

☐ **Dark mode**

Form Row/Grid (Inline Forms)

Enter email	Enter password

If you want your form elements to appear side by side, use `.row` and `.col` :

Example

```
<form>
  <div class="row">
    <div class="col">
      <input type="text" class="form-control" placeholder="Enter email"
name="email">
    </div>
    <div class="col">
      <input type="password" class="form-control" placeholder="Enter
password" name="pswd">
    </div>
  </div>
</form>
```

You will learn much more about columns and rows in the Bootstrap Grids Chapter.

Form Control Size

☐ Dark mode

☰   🏠   **HTML**   **CSS**   ◐   🌐   🔍

Normal input

Small input

You can change the size of `.form-control` inputs with `.form-control-lg` or `.form-control-sm` :

Example

```
<input type="text" class="form-control form-control-lg" placeholder="Large input">
<input type="text" class="form-control" placeholder="Normal input">
<input type="text" class="form-control form-control-sm" placeholder="Small input">
```

Try it Yourself »

Disabled and Readonly

Normal input

Disabled input

Readonly input

Use the disabled and/or readonly attributes to disable the input field:

Example

```
<input type="text" class="form-control" placeholder="Normal input">
<input type="text" class="form-control" placeholder="Disabled input" disabled>
<input type="text" class="form-control" placeholder="Readonly input" readonly>
```

☐ **Dark mode**

≡   🏠   HTML   CSS   ◐   🌐   🔍

Plain text Inputs

Plaintext input

```
Normal input
```

Use the `.form-control-plaintext` class to style an input field without borders, but keep proper marigins and padding:

Example

```
<input type="text" class="form-control-plaintext" placeholder="Plaintext
input">
<input type="text" class="form-control" placeholder="Normal input">
```

Color Picker

To style an input with type="color" properly, use the `.form-control-color` class:

Example

```
<input type="color" class="form-control form-control-color"
value="#CCCCCC">
```
