Bootstrap 5 Checkboxes and Radio buttons

⟨ Previous

Next ⟩

Checkboxes

Checkboxes are used if you want the user to select any number of options from a list of preset options.

☐ Option 1

☑ Option 2

☐ Disabled Option

Example

```
<div class="form-check">
  <input class="form-check-input" type="checkbox" id="check1"
name="option1" value="something" checked>
  <label class="form-check-label">Option 1</label>
</div>
```

Try it Yourself »

Example Explained

To style checkboxes, use a wrapper element with `class="form-check"` to ensure proper margins for labels and checkboxes.

☐ **Dark mode**

☰   🏠   **HTML**   **CSS**   ◑   🌐   🔍

Use the `checked` attribute if you want the checkbox to be checked by default.

Radio buttons

Radio buttons are used if you want to limit the user to just one selection from a list of preset options.

◉ Option 1
○ Option 2
○ Option 3

Example

```
<div class="form-check">
  <input type="radio" class="form-check-input" id="radio1" name="optradio"
value="option1" checked>Option 1
  <label class="form-check-label" for="radio1"></label>
</div>
<div class="form-check">
  <input type="radio" class="form-check-input" id="radio2" name="optradio"
value="option2">Option 2
  <label class="form-check-label" for="radio2"></label>
</div>
<div class="form-check">
  <input type="radio" class="form-check-input" disabled>Option 3
  <label class="form-check-label"></label>
</div>
```

Toggle Switches

If you want your checkbox to be styled as a toggle switch, use the `.form-switch` class together with the `.form-check` container:

🔵 Dark Mode   ☐ **Dark mode**
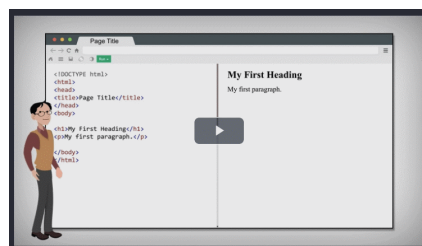

☰   ⌂   HTML   CSS   ◐   🌐   🔍

```html
<div class="form-check form-switch">
  <input class="form-check-input" type="checkbox" id="mySwitch"
name="darkmode" value="yes" checked>
  <label class="form-check-label" for="mySwitch">Dark Mode</label>
</div>
```
